

Lesson 10

Today in Class

This week we learned how to make notes go higher and higher or lower and lower TOWARD "Middle C". It's tricky but fun. As high notes get closer to "Middle C" they sound lower! As low notes get closer to "Middle C" they sound higher! That's funny! We worked more on our rhythms and double notes and played lots of new songs.

This Week at Home

- Go through the lesson with Mr. Bach.
- Miss Melody will have some fun practicing activities for you. As you play notes that get higher or lower try to sing along. Can your voice go higher, higher and lower, lower?
- In your house who has the highest voice? Who has the lowest voice? What animals have a high voice? What animals have a low voice?
- Visit the Games Room and have fun. Maybe this week you could play all the games!
- Don't forget to go to the Library for more review and new music.
- Go to the Improv Room to create some new songs!
