

Lesson 9

Today in Class

High, higher, higher; low, lower, lower. We know that "Middle C" is in the middle of the keyboard and that notes on the right hand side of the keyboard are high (bird) notes and that notes on the left hand side of the keyboard are low (whale) notes. Today we learned that the farther we go from "Middle C" the higher or the lower the notes sound. We played games where the notes went higher and higher or lower and lower - AWAY FROM "Middle C". We learned what this looks like when we write it with birds and whales and notes. We made new songs too!

This Week at Home

- Do the lesson with Mr. Bach.
- Miss Melody for some fun practice. Teach your parents how to play notes that go higher and higher or lower and lower away from Middle C.
- How can you make yourself go higher and higher? When you sit you are medium, when you kneel you are high, when you stand on your tiptoes you are higher! How can you make yourself lower and lower?
- Visit the Games Room for extra fun. Can you help the cave children cross the canyon to get home? Listen as the jungle birds sing. If you hear notes that get higher and higher, you play notes that get higher and higher, if you hear notes that get lower and lower, you play notes that get lower and lower. Sometimes the sounds go up and then down! This is a tricky surprise! I hope the jungle children don't fall in the water!
